## COMPANY PROFILE

## About Our Company

Eevetech Enterprises Pvt. Ltd., incorporated on 23rd September 2025, was founded by Joel Tomy Chungath and Levin Vincent Fernandez, experts in HVAC, air-conditioning systems, and electronic appliances. With strong experience in AC mechanics, installation, PCB design, reverse engineering, and electronic assembly, the founders have worked across all major areas of the industry, including importing and assembling AC parts and electronic components.

Our combined technical background and field experience inspired them to start Eevetech to provide customers with reliable, high-quality HVAC solutions and efficient service. Today, Eevetech serves both residential and commercial clients, offering AC sales, installation, servicing, luxury fan distribution, and imported electronic products with a focus on professionalism and customer satisfaction.

# Our Vision

---

01

To become a leading and trusted provider of HVAC, luxury appliances, and imported electronics across India through innovation and quality service.

02

To deliver advanced, reliable, and energy-efficient solutions that enhance customer comfort and everyday living.

03

To build a tech-driven company known for engineering expertise, customer satisfaction, and long-term value creation.

Our Project

# Major Brands We Deal With

# Our Projects

Eevetech Enterprises Pvt. Ltd. has successfully completed 50+ residential and commercial HVAC projects within a short period. Our work covers complete AC installations, servicing, ducting, cassette units, VRF systems, and luxury appliance setups.

- **Residential Apartments**, Centralized ducted AC system with VRF technology.
- **Showrooms & Retail Spaces** – Energy-efficient cassette AC installations ensuring uniform cooling.
- **Educational Institutions** – VRF systems for classrooms, labs, and auditoriums with low noise and optimal airflow.
- **Corporate Offices** – Wi-Fi-enabled smart AC units integrated with centralized controls.
- **Hospitals** - Vrf Systems for Hospitals and its 24/7 working LABs

Each project reflects our commitment to quality, timely execution, and after-sales support – reinforcing our reputation as a reliable HVAC partner.

# Our Facilities

Eevetech Enterprises pvt ltd is equipped with state-of-the-art infrastructure to support all aspects of HVAC operations—from distribution to after-sales service. Our facilities include:

- **Head Office & Administrative Hub** – Strategically located in Angamaly for smooth coordination and communication
- **Service & Maintenance Center** – Dedicated area for diagnosing, repairing, and testing AC units
- **Spare Parts Storage & Inventory Hub** – Well-managed inventory system to ensure quick delivery and replacement
- **Training & Technical Lab** – Facility to train technicians and staff on the latest GREE technologies and installations
- **Logistics & Dispatch Bay** – Streamlined delivery operations for timely fulfillment across Kerala and nearby states

These facilities empower us to ensure reliability, speed, and professionalism across every department. Our service centers and dispatch teams are trained to respond rapidly to dealer and customer needs, reducing downtime and enhancing customer satisfaction. The Springfield infrastructure ecosystem ensures a strong foundation for consistent growth, support, and trust.

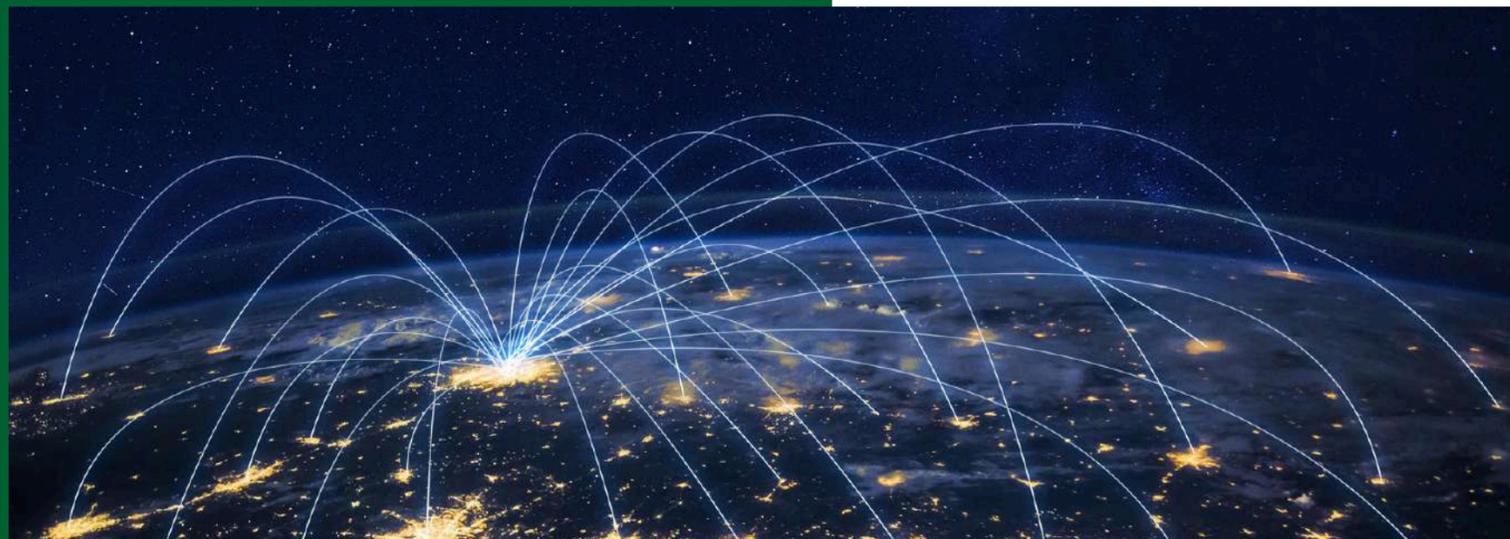

## **Network, Transportation & Pan-India Connectivity**

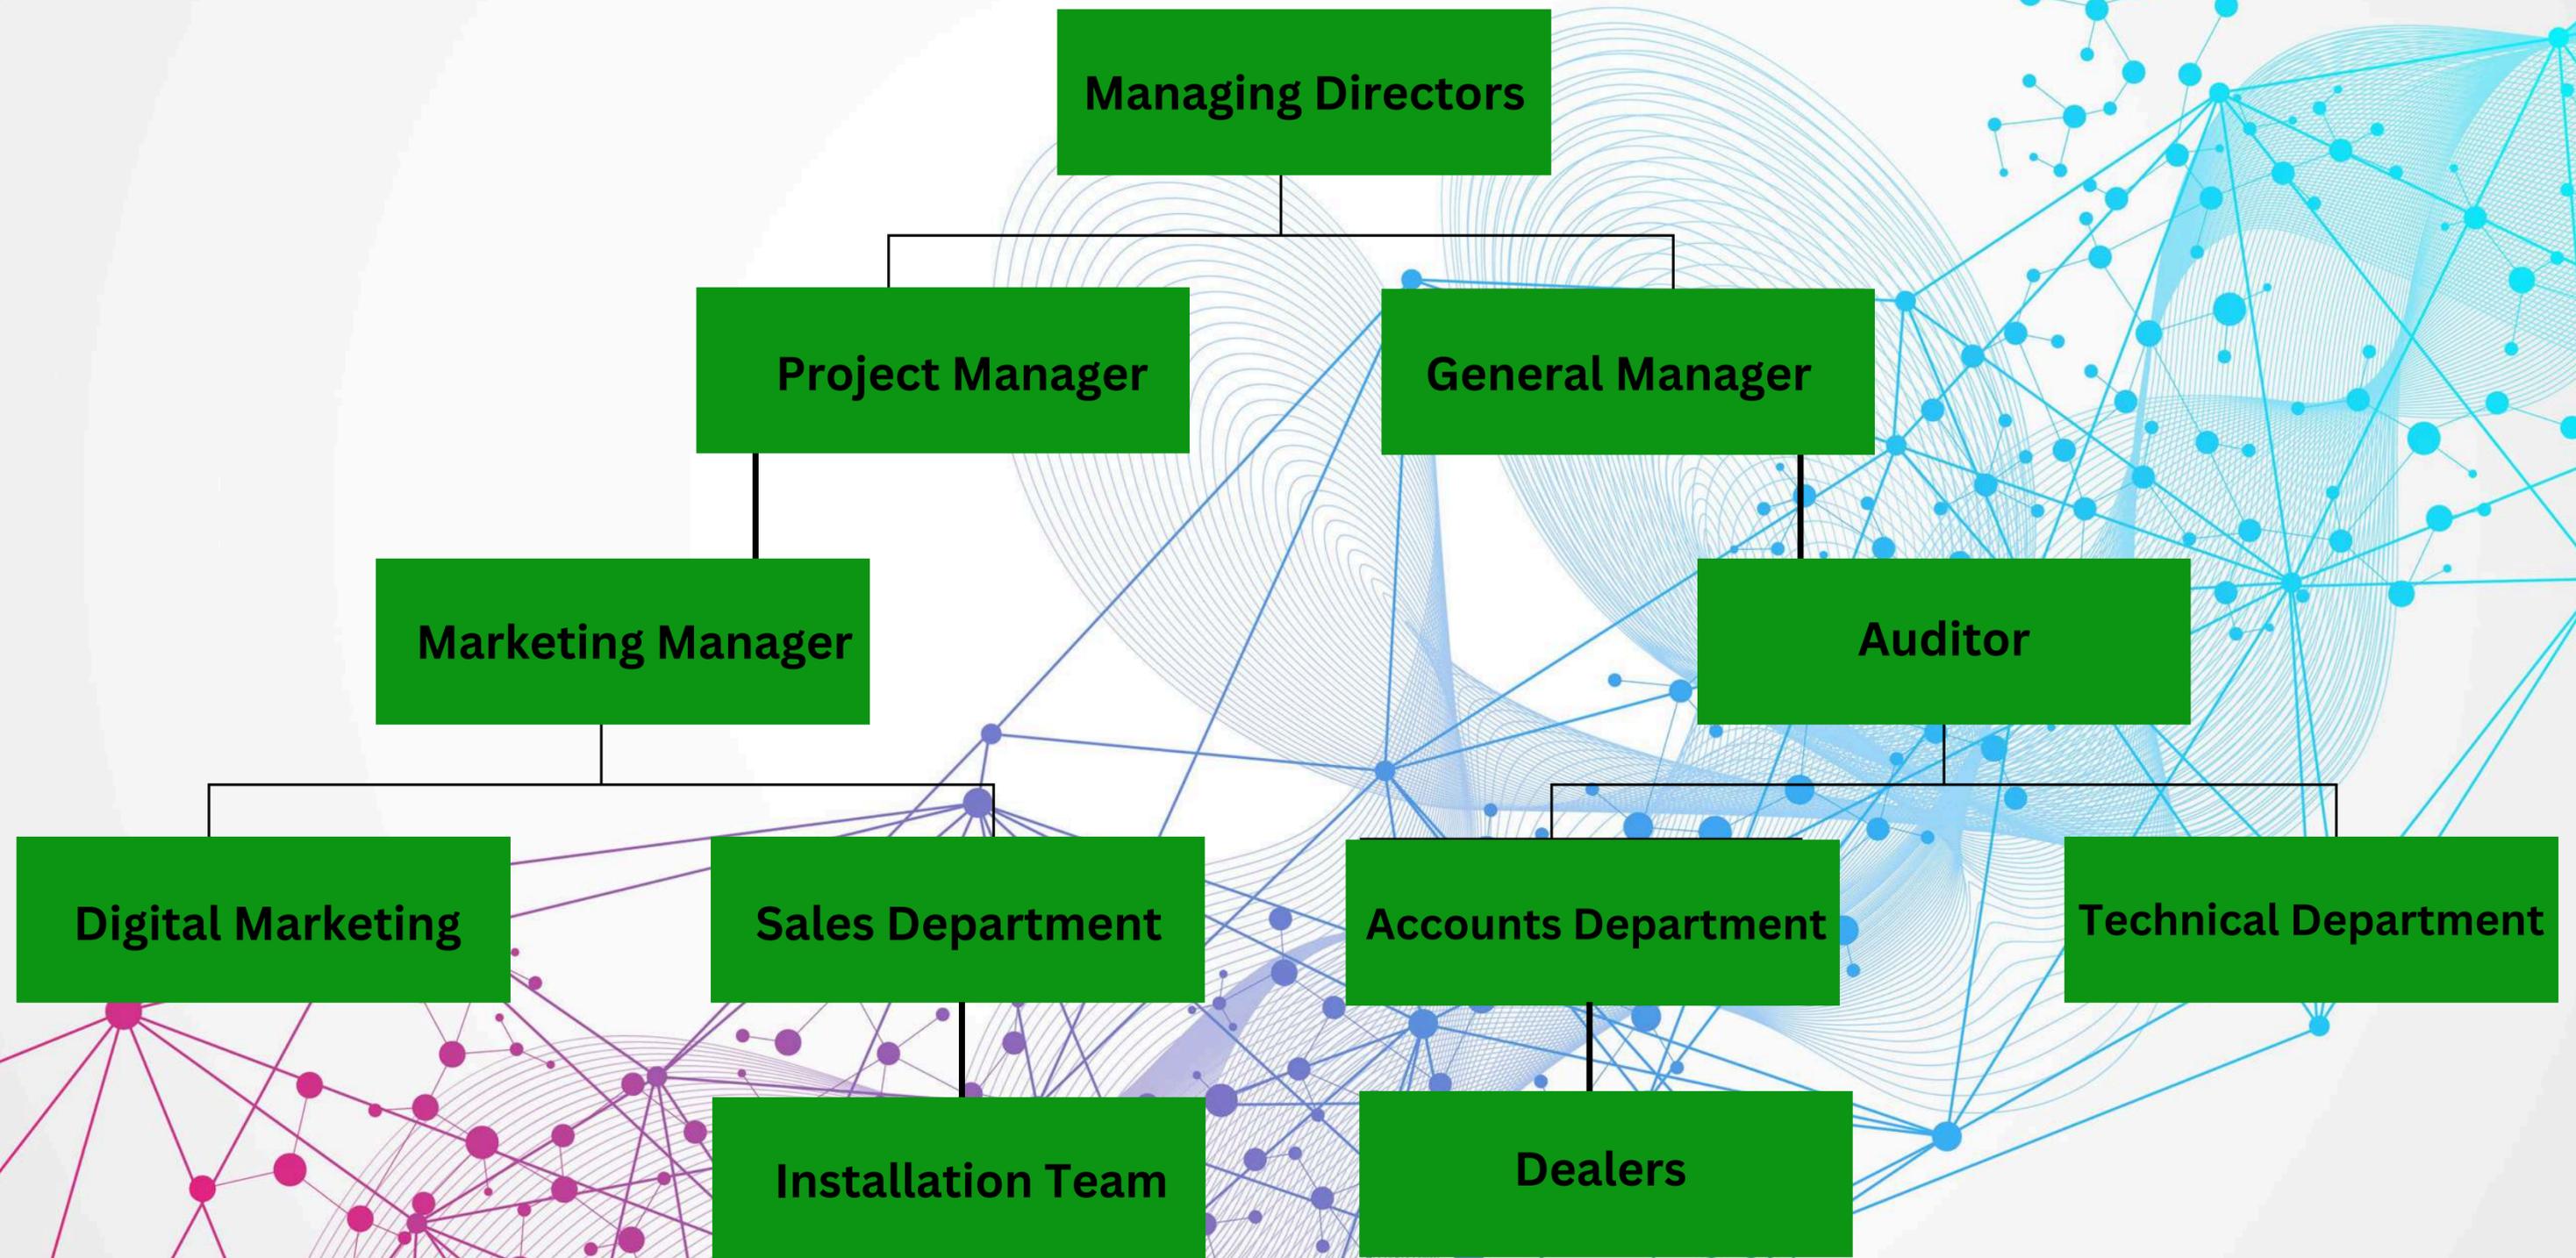

Eevetech Enterprises Pvt. Ltd. has developed a reliable and efficient logistics and supply network that supports smooth product movement and timely service delivery across India. With strong partnerships in transportation, import channels, and domestic distribution, we ensure quick access to HVAC systems, spare parts, luxury fans, and electronic products in all major states. Our expanding network enables us to serve residential and commercial clients nationwide, deliver bulk orders efficiently, and support large-scale installation projects with consistent availability of materials and technical teams.

### **Sub-Dealers and Local Partners**

In addition to our primary dealers, we have a growing network of sub-dealers and retail partners who ensure last-mile reach, quick delivery, and prompt service even in smaller towns and rural areas.

# Organizational structure

# Our Products

Eevetech Enterprises Pvt. Ltd. offers a wide range of high-quality products across the HVAC, luxury appliance, and electronics categories. We provide leading-brand air conditioners including LG, Mitsubishi, Daikin, Blue Star, Midea, Amstrad, Formenty, and Carrier—covering residential wall-mounted units, cassette ACs, ductable systems, and advanced VRF/VRV solutions. In addition, we are the authorized distributor of Magnific luxury fans, supplying premium designer fans for homes and commercial spaces. Through our strong import network in China, we also supply a variety of consumer electronics, including LED lights, switches, small appliances, PCB-based components, and high-demand market products. Every product we offer reflects our commitment to performance, reliability, and customer satisfaction.

### Split Air Conditioners

We offer a wide range of high-performance Split Air Conditioners designed for residential and small commercial use. Our models—Fairy, Lomo, and Bora—combine sleek design, energy efficiency, and powerful cooling capabilities. These units are ideal for customers seeking cost-effective, reliable, and aesthetically pleasing air conditioning solutions.

### Cassette & Ductable AC Units (U-Match Series)

Our U-Match Series includes both Cassette and Ductable AC units, designed to deliver efficient and flexible cooling solutions for commercial and medium-sized spaces. These systems are compatible with multiple outdoor units, providing reliable performance and easy integration into various building layouts. The ceiling-mounted Cassette units offer even air distribution with a discreet design, while Ductable units ensure centralized cooling with concealed ductwork, ideal for spaces that demand both aesthetics and efficiency.

## VRF Systems

We provide advanced VRF (Variable Refrigerant Flow) Systems that deliver intelligent, multi-zone cooling and heating solutions. These systems are designed to operate with a single outdoor unit connected to multiple indoor units, allowing for individualized temperature control across different zones or rooms. VRF systems offer centralized management, exceptional energy efficiency, and flexible installation—making them ideal for large buildings, hotels, office complexes, and mixed-use commercial spaces where independent climate control is essential.
